

# Technical data for the automotive aftermarket

Audagarage is now part of Autodata's industry-leading technical data platform. Autodata is one of Europe's leading suppliers of technical information; supporting the service, maintenance, diagnostics and repair of motor vehicles. With over 40 years of experience, Autodata's workshop applications are widely acknowledged as some of the most comprehensive on the market.

**Service Maintenance**

**Diagnostics**

**Repair**

## Safe and profitable working for bodyshops

Whether you provide service, maintenance, diagnostics or repair, we support you in doing so quickly, accurately, safely and profitably.

**Technical data covering 99% of vehicles on the road**

Audagarage powered by Autodata.

Autodata, one of the most trusted and widely used technical information databases to the automotive aftermarket, is now part of the Solera family, Audatex's parent company.

**Simple to use, intuitive interface**

Key-in make, model or VRM and select the correct vehicle.

Flexible subscription plan with *no hidden costs*.

**Autodata**
